VITAMIN

01

On July 8, the signing ceremony of the "Joint Laboratory of Bio-based Chemical Fibers" jointly established by Huaheng Biotechnology and Donghua University was grandly held at Huaheng Biotechnology (Hefei) Research Institute. This cooperation will give full play to the advantages of both parties in the integration of industry, academia and research, scientific research and innovation, and jointly promote the development of the PDO-PTT industrial chain and cutting-edge research in the field of bio-based fiber technology, and promote the sustainable and high-quality transformation of the downstream textile industry.

AMINO ACID

02

Lysine: The export order of lysine hydrochloride is good, and the spot supply is tight. The quotation in the trade market is stable, and the terminal is mainly replenished due to rigid demand, and some users are waiting and watching. The factory orders are signed until early October, and the export quotation is adjusted to be strong. The export price of 98.5% lysine is about USD 1.35-1.42/KG. Some factories have carried out maintenance one after another. Pay attention to the maintenance and export situation. It is expected that the price of lysine hydrochloride will be strong in the short term.

API

03

Florfenicol, the market supply and demand are relatively stable recently, some brands are priced relatively low, and overall the price has little room for decline. The factory price is currently stable at around 185, and we will continue to pay attention to changes in market demand and supply in the future.

FOOD ADDITIVE

04

It is understood that Weikang Probiotics has completed its D round of financing, the amount of which has not been disclosed, and the investors are Suzhou Guofa Venture Capital, China Merchants Capital, and Guotou Chuanghe. Founded in 2013, Weikang Probiotics is a probiotic strain and derivative research and development company that provides highly active probiotic powder, fermented food strains, microbial products and application solutions for health foods, dairy products, food, precision medicine, daily chemical products and other fields.
