Vitamins to VEGA!

15TH. NOVEMBER. 2024

## VITAMIN

01

EuroTier extension market information essence:

1. Vitamin E: There is news that a European factory plans to stop production in 2025, which may lead to VE oil relying on external purchases. This change will make the steady upward trend of VE prices in 2025 clearer.
2. Vitamin D3: Currently facing a shortage of raw materials, there are rumors that a European factory has stopped production; indicating that in the first half of 2025, the market transaction price is expected to further jump to more than USD50/KG.
3. Folic acid: Folic acid domestic factories suddenly stopped quoting and signing orders. Due to the long-term sluggish market, this sudden situation caught the market off guard, resulting in the current market inventory remaining at a low level.
4. Vitamin A: At present, the market price of VA remains stable, and the prices of upstream factories remain strong.

## AMINO ACID

02

On November 14, 2024, the Harbin Branch of Elephant (Beijing) Food Group Co., Ltd. released the following tryptophan prices: SEWON brand 98% tryptophan is priced at USD7/KG, SEWON brand 50% tryptophan is priced at USD3.3/KG

## API

03

Recently, the oxytetracycline hydrochloride market has seen a slight increase in prices due to tight overall delivery conditions at mainstream factories. The current market transaction price is USD11-12/KG, and it is expected that prices will remain strong in the short term. At the same time, delivery conditions before the New Year are expected to remain tight. In this regard, we need to pay close attention to the production progress of factories and changes in market demand.

## FOOD ADDITIVE

04

Recently, the prices of carnitine products have risen due to the dual influence of market conditions and raw material supply. Specifically, the mainstream manufacturers' quotation range for carnitine Base is USD20.5--22/KG; the mainstream quotation range for L-carnitine hydrochloride is USD22.5--23.5/KG; and the mainstream quotation range for L-carnitine tartrate is USD19.5--20.65/KG. In the short term, prices are still on the rise, and it is recommended to continue to pay attention to market trends.
